IST622 Questionnaire Development

Course Title: IST622 Questionnaire Development

Client: California State University, Monterey Bay

Instructor: Dr. Su Bude

Instructional Designer: Sarah Wright

Authoring Tool: Lumi H5P

Audio Tool: Windows Sound Recorder

Audio Host: Panopto

Duration (scope): 20-25 minutes

File Formats: Canvas SCORM Assignment, Github
HTML, Github SCORM

Due Date: 5.15.24

		Graphic Info:
		Media: Instructional on-screen text, background image and audio
		Navigation:
		Linear (next and previous or table of contents)
		Reviewer Comments:
Audio:		
<p>“The main purpose of reaction evaluation is to enhance the quality of instructional or training programs, which in turn leads to improved performance. Reaction evaluations are a type of formative evaluation. Where the results are used for program evaluation and the redesign of content, course materials, and presentations. Reaction evaluation can also be summative in nature, the goal then is to determine the value, effectiveness, or efficiency of a training program.”</p>

		Graphic Info:
		Media: Instructional on-screen text, background image and audio
		Navigation:
		Linear (next and previous or table of contents)
		Reviewer Comments:
Audio:		
<p>“While a reactionnaire can help evaluators to understand the above mentioned items on this slide, it is very important to know that reactionnaires cannot measure learning, changes in attitudes or beliefs, transfer of skills or knowledge, or organizational impact.”</p>		

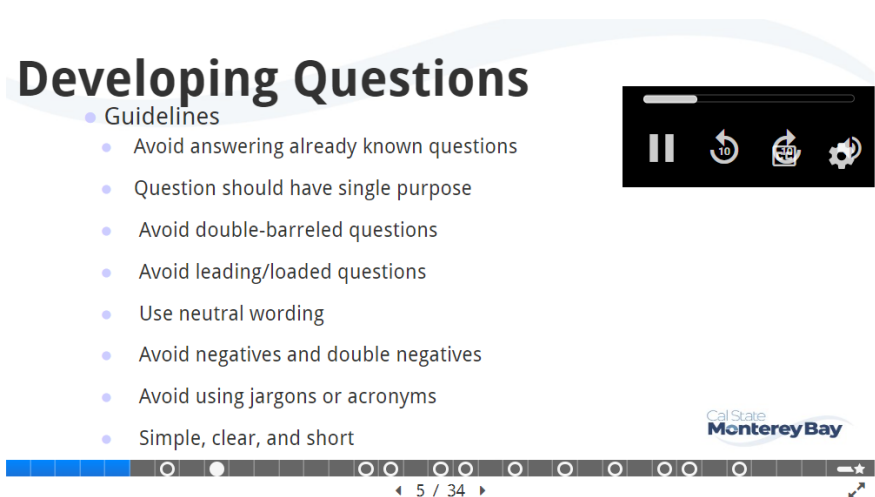

IST526 Storyboard:

IST622 Questionnaire Development

Project Name: Questionnaire Development	Screen Title: Nature of Reactionnaires	Screen #: 4
		
Graphic Info:		
Media: Instructional on-screen text, background image and audio		
Navigation:		
Linear (next and previous or table of contents)		
Reviewer Comments:		
Audio:		
“Since reactionnaires are self-reports, they are surely subjected and sensitive to the context and expectations. Context examples include required or voluntary surveys.”		

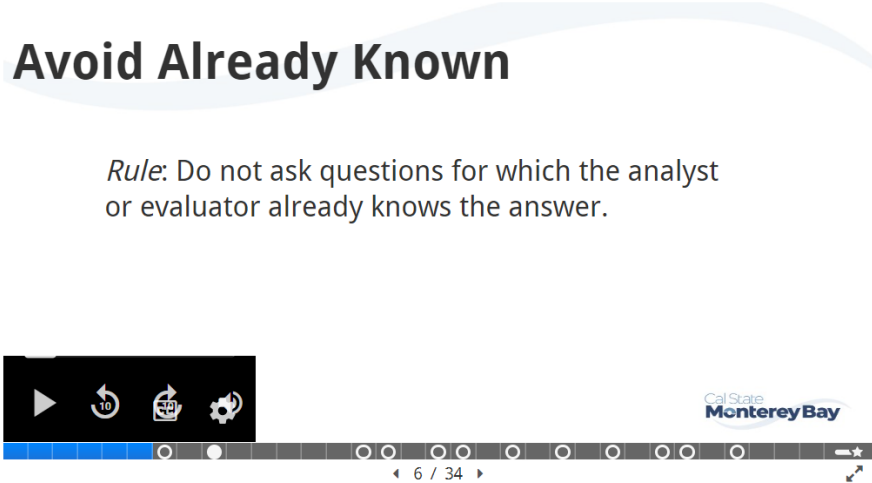

IST526 Storyboard:

IST622 Questionnaire Development

Project Name: Questionnaire Development	Screen Title: Developing Questions	Screen #: 5
 <p>Developing Questions</p> <ul style="list-style-type: none"> Guidelines <ul style="list-style-type: none"> Avoid answering already known questions Question should have single purpose Avoid double-barreled questions Avoid leading/loaded questions Use neutral wording Avoid negatives and double negatives Avoid using jargons or acronyms Simple, clear, and short <p>Cal State Monterey Bay</p> <p>◀ 5 / 34 ▶</p>		Graphic Info:
		Media: Instructional on-screen text, background image and audio
		Navigation: Linear (next and previous or table of contents)
		Reviewer Comments:
Audio: “One of the most critical factors in survey design is question development. This includes how questions are worded and also how the types of questions are asked, and whether there are only one or multiple questions for each category. Let’s use some examples to illustrate the rules mentioned on this slide next.”

<p>“Besides developing good survey questions, having a clear introduction and directions of responding, is also important as shown on this slide. Other things you want to pay attention to include: 1. when to administer the questionnaire, 2. who should administer, 3. how much time to allow, 4. anonymity or confidentiality, 5. how to ensure a high response rate.”</p>
